

HEXLE Education - Feature Overview

As of: 07.07.2026

This overview summarises all HEXLE Education features: WebUntis synchronisation, pool-lesson planning, student booking and automatic reallocation on absences - centrally in one web app within the HEXLE Cloud.

HEXLE Education features

Master data (WebUntis-synced)

- ✓ School years synced from WebUntis (read-only)
- ✓ School classes incl. student assignment
- ✓ Class groups with booking and fallback rules
- ✓ Students from sync, self-service or manual entry
- ✓ Teachers linked to their HEXLE Core user
- ✓ Subjects incl. pool-relevance flag

Pool-lesson engine

- ✓ Pool periods as validity and booking windows
- ✓ Pool slots with teacher, room, subject, group, capacity
- ✓ Individual dates generated automatically from slots
- ✓ Booking obligations per student
- ✓ Automatic dissolution & reallocation on absence
- ✓ Weekly teacher target with A/B weeks, rounding and variance
- ✓ Planning report for teachers

Integration & platform

- ✓ WebUntis synchronisation (on-demand & scheduled)
- ✓ Booking via HEXLE Bookings into real course dates
- ✓ Users & permissions via HEXLE Core
- ✓ School settings (rounding mode, variance mode)
- ✓ Role-based permissions, BASIC / BUSINESS account mode

Coming soon

In planning

- ✓ Grade management (coming soon)
- ✓ More modules to follow
- ✓ Extended school administration (coming soon)
